# Lanolin

## The soft texture of wool came to life with Lanolin.

The use of materials obtained from sheep wool dates back to ancient times. Lanolin oil is also an oil secreted from sheepskin. Lanolin is sometimes referred to as "wool oil," but the term is misleading because it lacks triglycerides, which should be considered fat. But unlike the sebum in our body, it does not contain triglycerides.

Nurture your skin and enhance your sleep with the protective benefits of our Lanolin Mattress Ticking. Infused with the softening properties of lanolin, this fabric offers a delicate embrace, ensuring your sleep is as comforting as it is restful.

- **\*Skin-Softening Lanolin\***: Infused with the natural softness of lanolin for a gentle, nurturing sleep surface.

- **\*Protective Comfort\***: Lanolin provides a subtle protective barrier, helping to preserve the mattress and your skin.

- **\*Luxurious Feel\***: Enhances the natural softness of your mattress ticking for a more indulgent sleep experience.

- **\*Hypoallergenic Qualities\***: Ideal for sensitive skin, reducing the likelihood of irritation and allergies.

Lanolin Mattress Ticking is an embodiment of care and luxury, a premium choice for a soothing, protective sleep environment that pampers you through the night.
